IILM University
Greater Noida

INTERNSHIP COMPLETION PRESENTATION

Host Organization
YuvaIntern
Junior Web Developer – E-Governance & Digital Services

Student Name:-Akriti Agarwal
Roll No. 25SCS1003001686
Degree:-B.Tech – Computer Science & Engineering (AI/ML)
Academic Batch:- 2026–2027
University:-IILM University,Greater Noida,Uttar Pradesh
Semester:- 3rd

4-WEEK INTERNSHIP

Candidate's Declaration

I, Akriti Agarwal, hereby declare that the internship work presented in this presentation was completed by me as part of the requirements for the B.Tech CSE program. The work and references have been presented honestly and are based on the internship deliverables and supporting material.

Akriti Agarwal

Roll No. 25SCS1003001686

Acknowledgement

✓

I express my sincere gratitude to YuvaIntern for providing the opportunity to work in the domain of E-Governance & Digital Services. I am thankful for the guidance, feedback and learning opportunities received throughout the internship. I also thank my university, faculty members and my parents for their support.

Akriti Agarwal

B.Tech CSE (AI/ML) • Batch 2026–2027

Internship Completion Certificate

CERTIFICATE OF EXPERIENCE

To Whomsoever It May Concern

This is to certify that **Akriti Agarwal** successfully completed an internship with **YuvaIntern** in the role of **Junior Web Developer - E-Governance & Digital Services**.

Throughout the tenure of this internship, Akriti demonstrated consistent dedication, professionalism, and a strong willingness to learn and grow. Their contributions were valued by the entire team at YuvaIntern, and they conducted themselves with integrity and commitment throughout the program.

We commend Akriti's hard work and wish them continued success in all future endeavors.

Date of Issue: August 26, 2026

FOR AND ON BEHALF OF YUVAINTERN

Issued: 26 August 2026

Role: Junior Web Developer – E-Governance & Digital Services

Internship at a Glance

Organization

YuvaIntern

Role

Junior Web Developer
E-Governance & Digital Services

Duration

4 weeks

Domain

Digital public services

The internship combined interface design, quality assurance, testing strategy, and benchmark-led audit thinking for a conceptual e-governance service platform.

DESIGN | QA & TESTING | ACCESSIBILITY | SECURITY | PERFORMANCE

Organization & Internship Context

YUVAINTERN

Internship organization

Role

Junior Web Developer

Focus

E-Governance & Digital Services

The supplied certificate confirms the organization, role and successful completion of the internship.

Citizen focus

Clear and usable service journeys.

Digital delivery

Discovery, application and tracking.

Trust

Accessibility, privacy and security.

Problem Statement

Public digital services must work for people — not just for the system behind them.

01 **Usability**

A clear path from finding a service to tracking a request.

02 **Accessibility**

Usable across different interaction and assistive needs.

03 **Security**

Identity, authorization, inputs, sessions and records need protection.

04 **Performance**

Slow or unreliable services can become barriers to access.

Goal: create a service journey that is understandable, responsive, inclusive, secure and dependable.

Project Objectives

1. Design a responsive information architecture for a digital public-service portal.
2. Make service discovery, service details, application and tracking easier to understand.
3. Use reusable interface patterns for forms, cards, controls, alerts and status indicators.
4. Embed accessibility, usability and error recovery into the design process.
5. Develop a structured QA strategy covering functional and non-functional quality.
6. Define performance, accessibility and security checks using recognized benchmarks and standards.

Scope of the Work

1 **Service experience**

Landing page, search/browse, service details, application, confirmation and status tracking.

2 **Quality assurance**

Testing levels, test lifecycle, detailed scenarios, defect management, quality gates and release thinking.

3 **Audit & readiness**

Performance, accessibility, security, privacy, reliability, monitoring and remediation planning.

Important limitation The audit material describes a hypothetical platform; it does not claim live production measurements or verified real-world vulnerabilities.

CivicConnect — Conceptual Service Portal

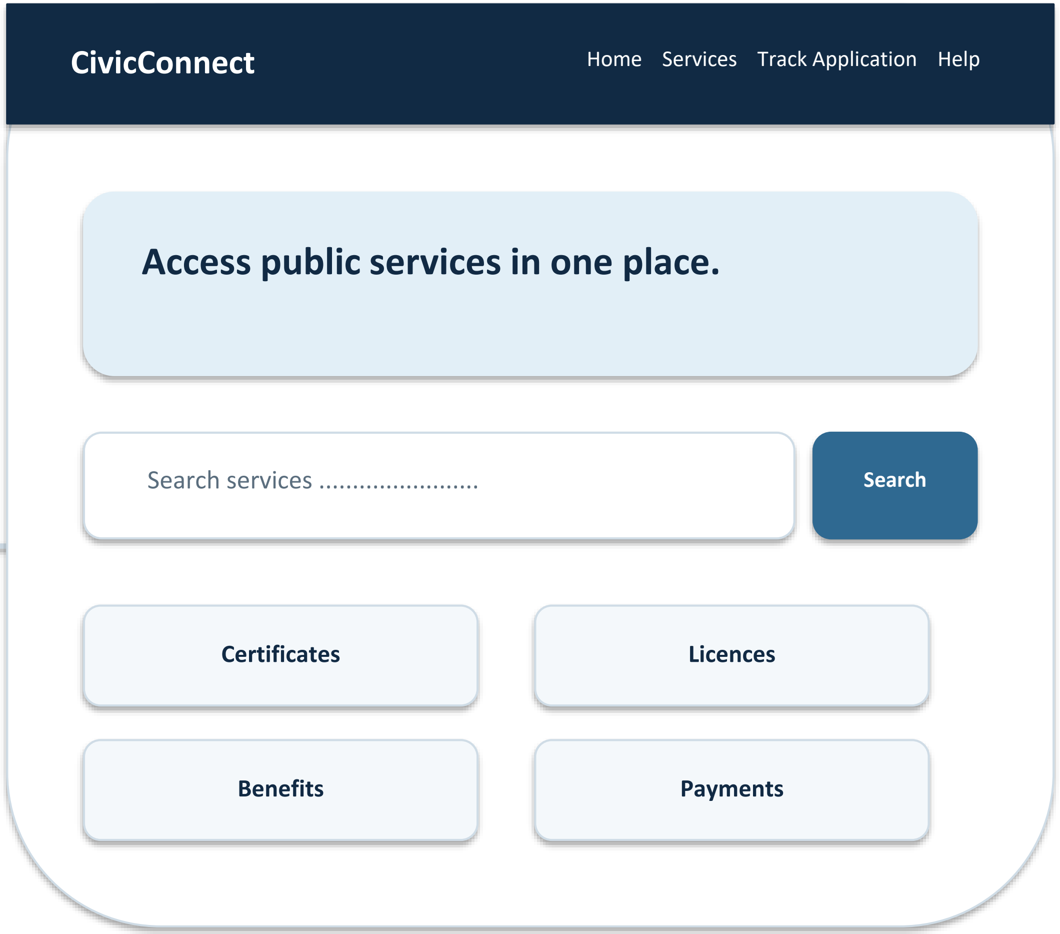
A task-first digital public-service experience

The concept focuses on helping users discover a service, understand requirements, complete an application, receive confirmation and track progress.

1 Discover

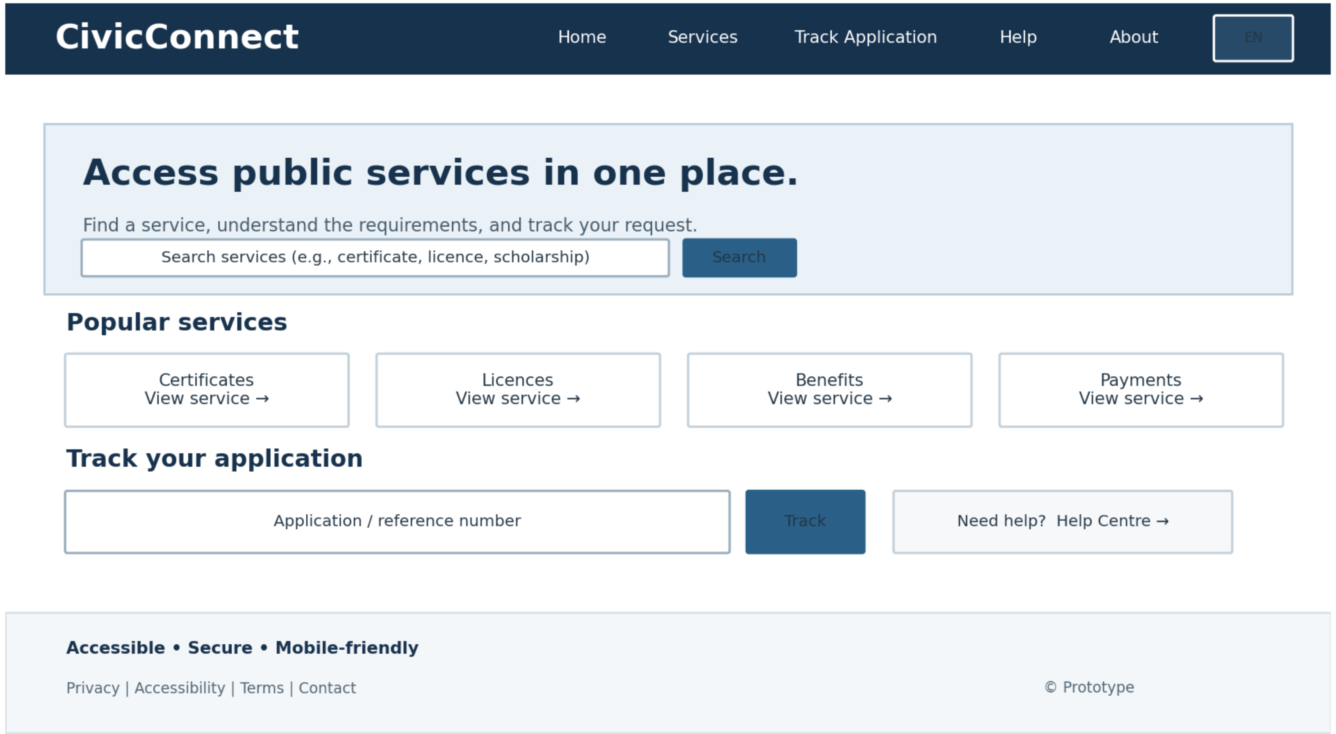
2 Understand

3 Apply

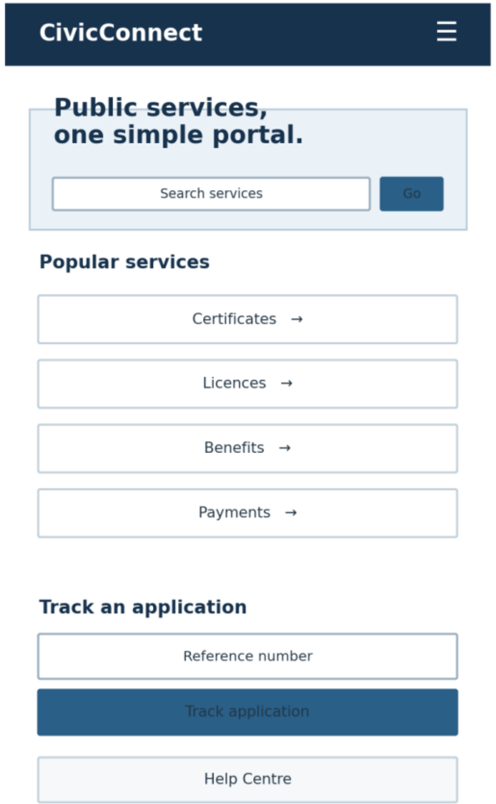


Responsive Interface & User Experience

High-Fidelity Desktop Home Page



Mobile Responsive View

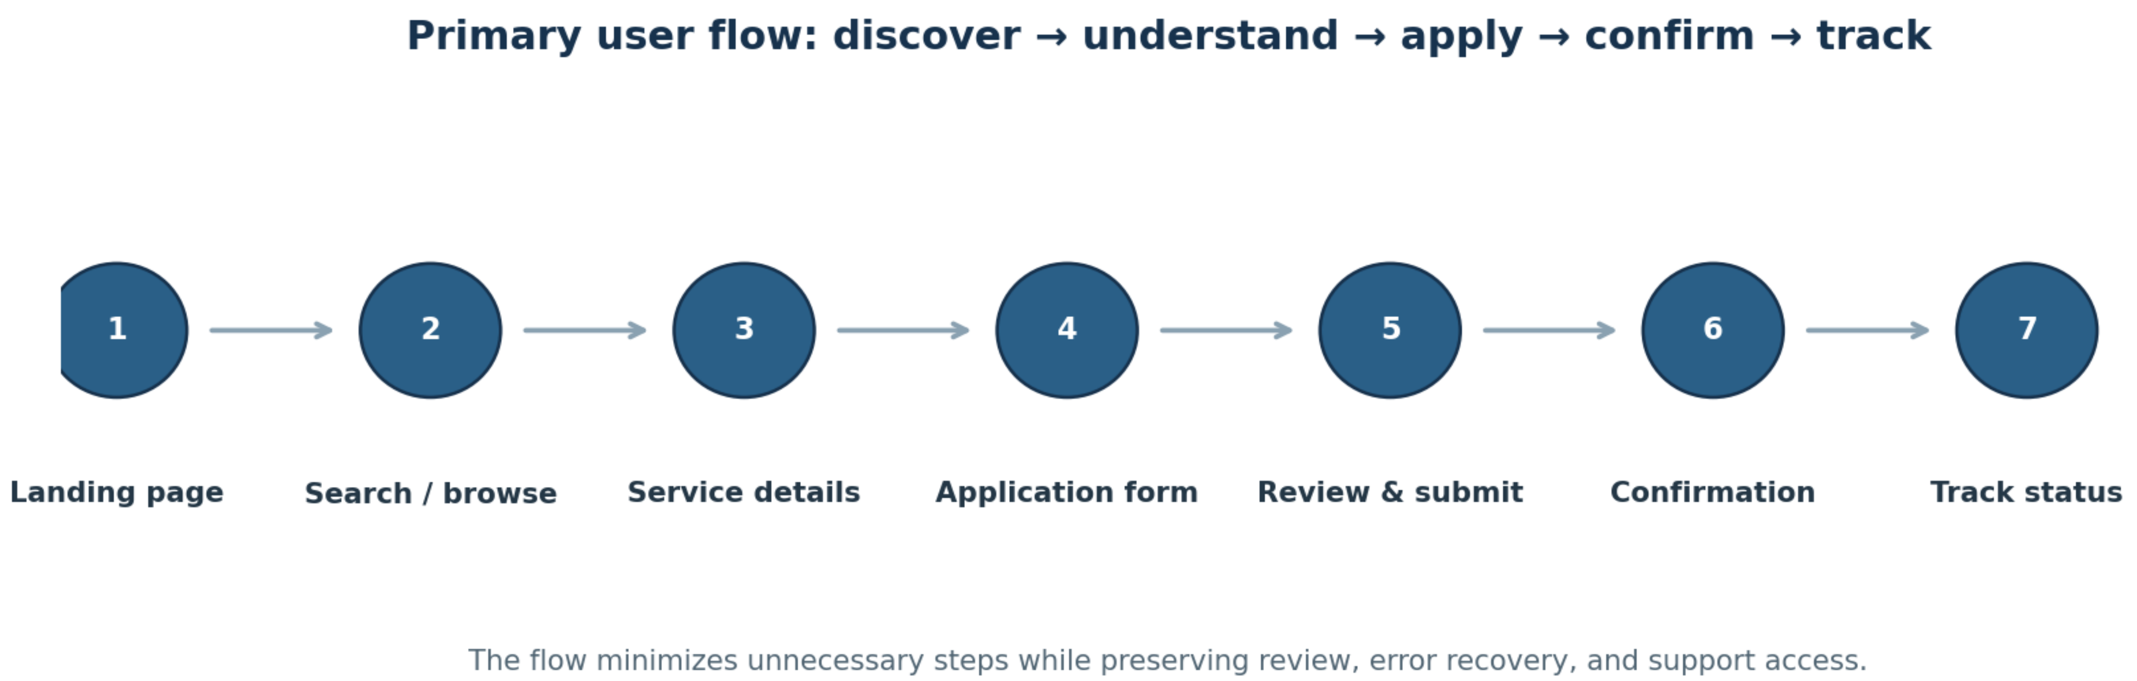


Desktop

Mobile

Search-first discovery • service cards • progressive disclosure • multi-step forms • visible status • mobile-friendly controls

Primary User Flow



The flow minimizes unnecessary steps while preserving review, error recovery and support access.

QA & Testing Strategy

A layered, risk-based approach was defined for the digital-service platform.

Functional
Core workflows

Integration
API & services

Regression
Protect fixes

Performance
Load & stress

Security
Auth & input

Usability
Task clarity

Accessibility
Inclusive access

Compatibility
Browsers/devices

Testing lifecycle

1. Requirements
2. Test design
3. Environment
4. Smoke
5. Execution
6. Defects
7. Regression
8. Release

Representative Test Coverage

ID	Scenario	Type	Priority
TC-01	**Registration**	Functional	P1
TC-02	**Login & session control**	Functional + Security	P0
TC-03	**Service search**	Functional + Usability	P2
TC-04	**Application submission**	Functional + Integration	P0
TC-06	**Document upload**	Functional + Security	P1
TC-08	**Authorization**	Security	P0

10 detailed scenarios were documented, including positive, negative, boundary, integration, authorization and security-oriented checks.

Conceptual System Architecture

Assumed architecture used for QA and audit analysis

CITIZEN / ADMIN
Web or mobile interface

API / APPLICATION
Business rules • validation • authorization • rate limiting

DATA & SERVICES
Database • document storage • notifications • identity / external services

SECURITY
auth • sessions • access

MONITORING
logs • metrics • alerts

Performance, Accessibility & Security

1 PERFORMANCE

Core Web Vitals, TTFB, API latency, throughput, errors and availability.

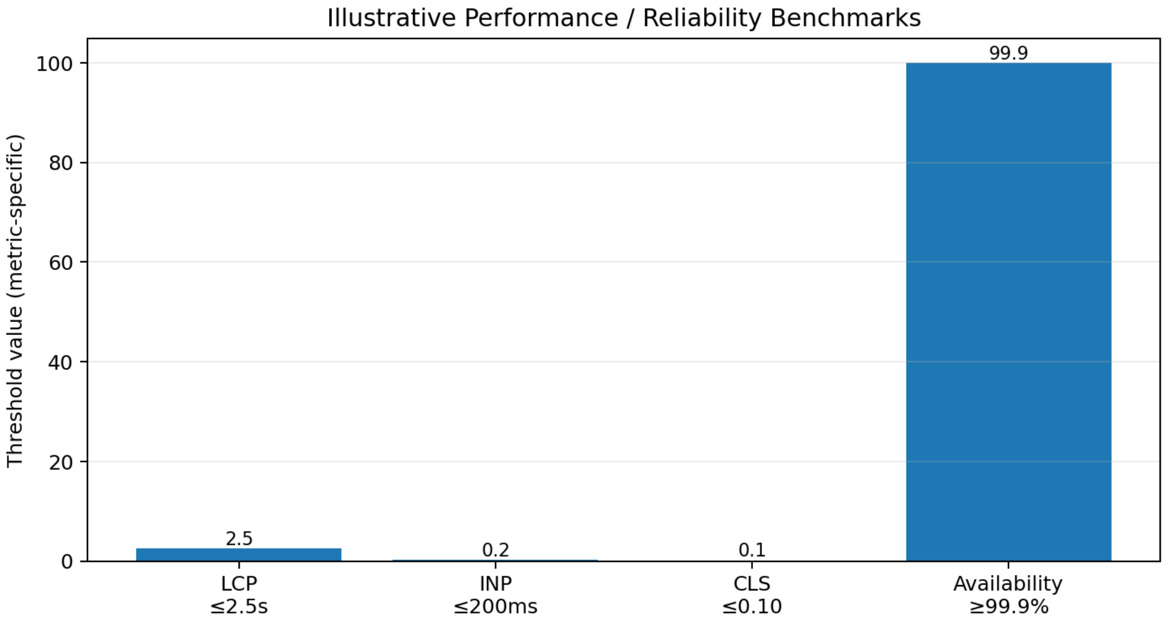
2 ACCESSIBILITY

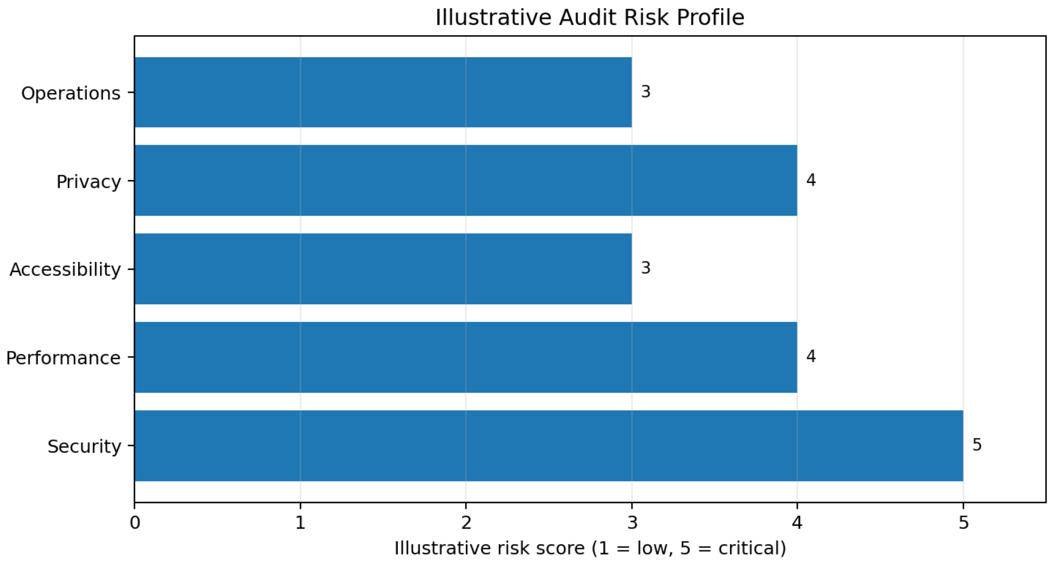
Keyboard access, focus, semantics, contrast, forms, zoom/reflow and assistive technology.

3 SECURITY

Authorization, injection/XSS, session security, TLS, secrets and dependency controls.

Illustrative benchmark/risk visuals from the audit report — not live production measurements.





Tools, Standards & Evaluation References

WCAG 2.2
Accessibility benchmark

OWASP Top 10
Web security reference

Core Web Vitals
User experience metrics

Lighthouse / DevTools
Performance evidence

SAST / DAST
Security testing approach

RUM / APM
Monitoring & performance evidence

Note: the supplied internship material documents these standards and evaluation approaches; it does not specify a production implementation stack.

Expected Outcomes & Learning

✓ Design thinking

Translate user needs into task-first information architecture and responsive interface decisions.

✓ QA mindset

Think in terms of requirements, test coverage, risk, defects, regression and release quality.

✓ Security awareness

Recognize authorization, input handling, session and data-protection concerns.

✓ Accessibility

Treat inclusive access as a design requirement rather than a final-stage check.

✓ Performance

Understand how LCP, INP, CLS and service-level indicators frame user experience.

✓ Documentation

Present technical decisions, evidence, limitations and recommendations clearly.

Overall outcome

A stronger understanding of how a digital service moves from user experience to quality, security and operational readiness.

CONCLUSION

From interface design to quality assurance and audit thinking

The internship provided practical exposure to designing citizen-centric digital-service experiences and evaluating them through usability, testing, accessibility, performance and security perspectives.
